

Enr. No. : 2302030430081

Assignment : 1

[Ans 1 :]

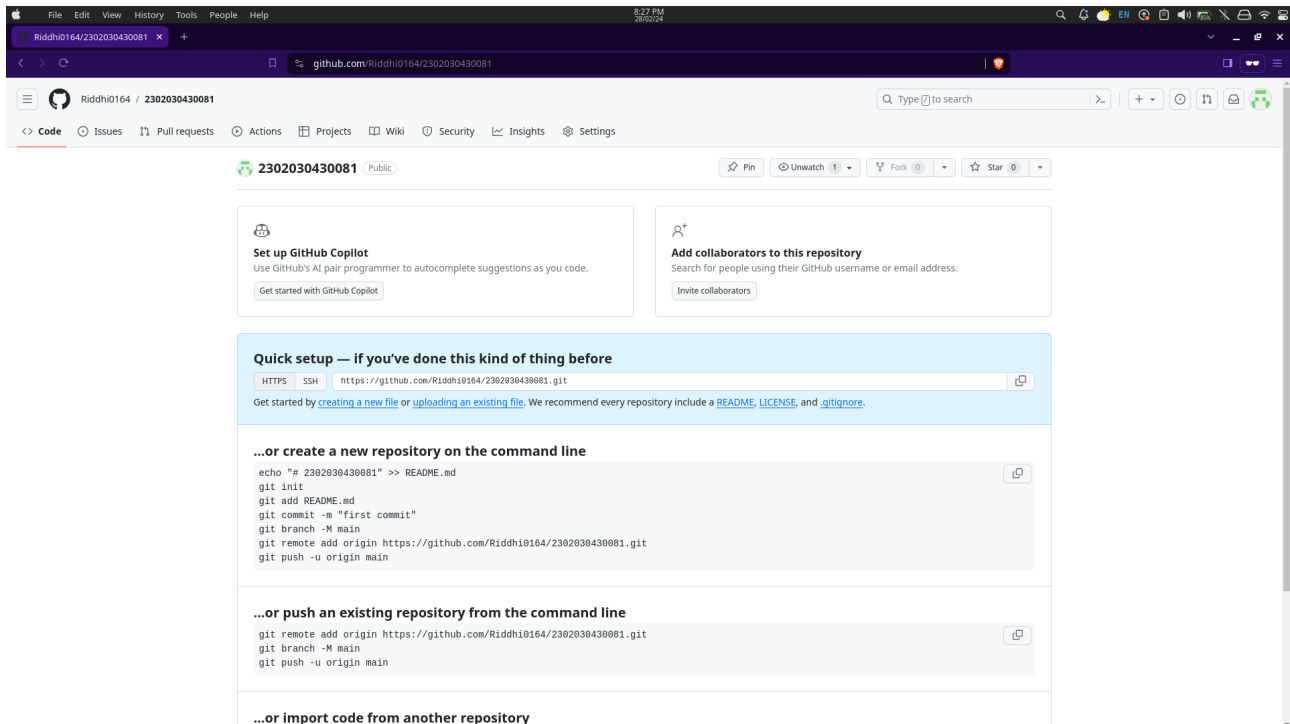

Step 1: click on the “New” button to create a new repository.

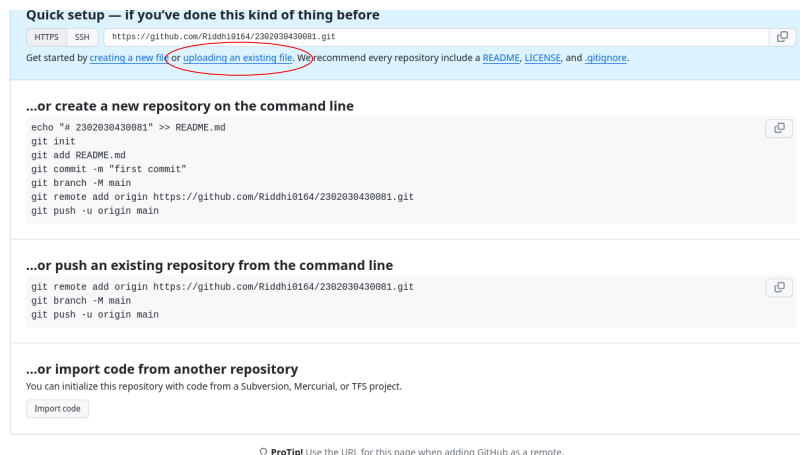

Step 2 : Give the name of the repository. Make it public or private by clicking on the given options. Add a README file if you want to. After that click on the “Create repository” button.

A screenshot of the 'Create a new repository' form on GitHub. The form includes fields for 'Owner' (Biddhi0164), 'Repository name' (2302030430081), and 'Description' (This Repository is for SOU assignments). The 'Public' radio button is selected and circled in red. Below the form, there are checkboxes for 'Add a README file' and 'Add .gitignore', and a 'Choose a license' section. At the bottom, a green 'Create repository' button is circled in red. A note at the bottom states: 'You are creating a public repository in your personal account.'

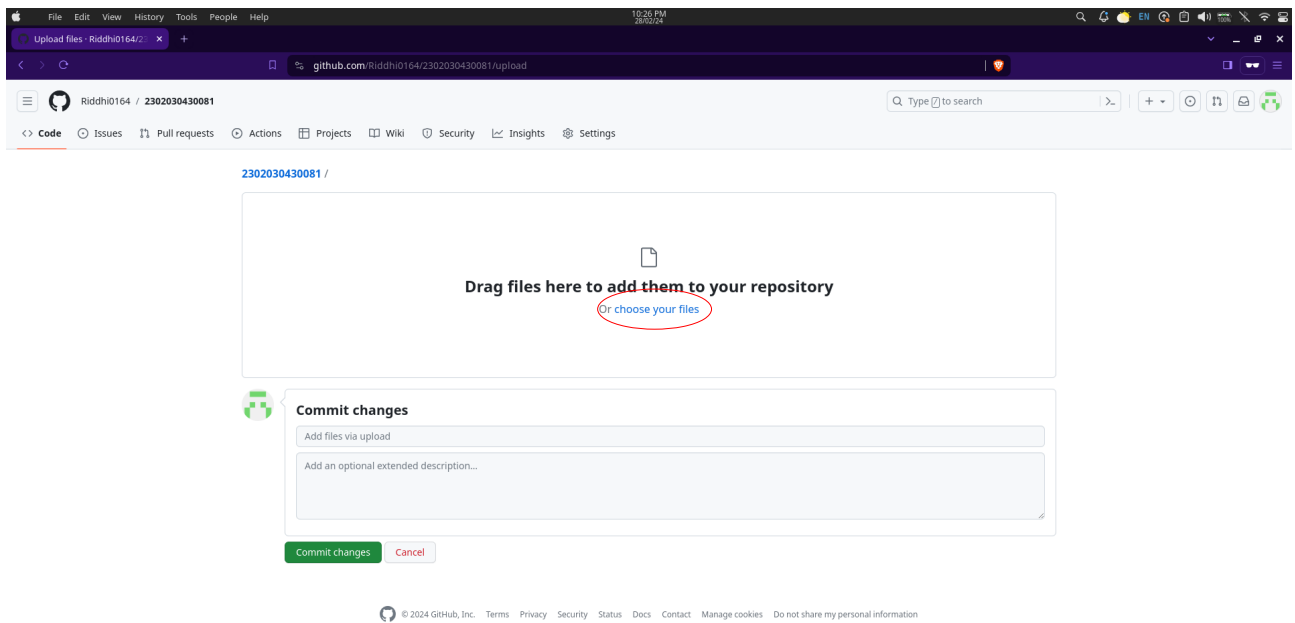

Like that, your GitHub repository has been created successfully.

Step 3 : Scroll down and you will see the option for importing code.

Click on “uploading an existing file” and you can start importing the code files and folders to your REPO or follow the commands and execute them.

Or you can Click on “choose files” then select files or folders and upload them.
